

# Absolute Protective Coatings

## Color Guide

Whether you're looking for a basic safety yellow line, grey forklift aisles, or designating a hearing 'hearing protection required' safe zone in purple. Absolute Protective Coatings can help you find the perfect color to make your statement.

Combining the latest pigment technologies with our revolutionary polymer systems allows us to deliver beautiful, long-lasting, U/V Stable colors that suit nearly all imaginations or corporate color schemes.

Consider the following before selecting your color.

- ❖ Colors with matte finishes will appear differently than colors with high gloss finishes.
- ❖ Bright colors with high gloss surfaces are great for inspection areas and places like showrooms.
- ❖ Severe duty protection areas tend to look best over time with a simple std grey.

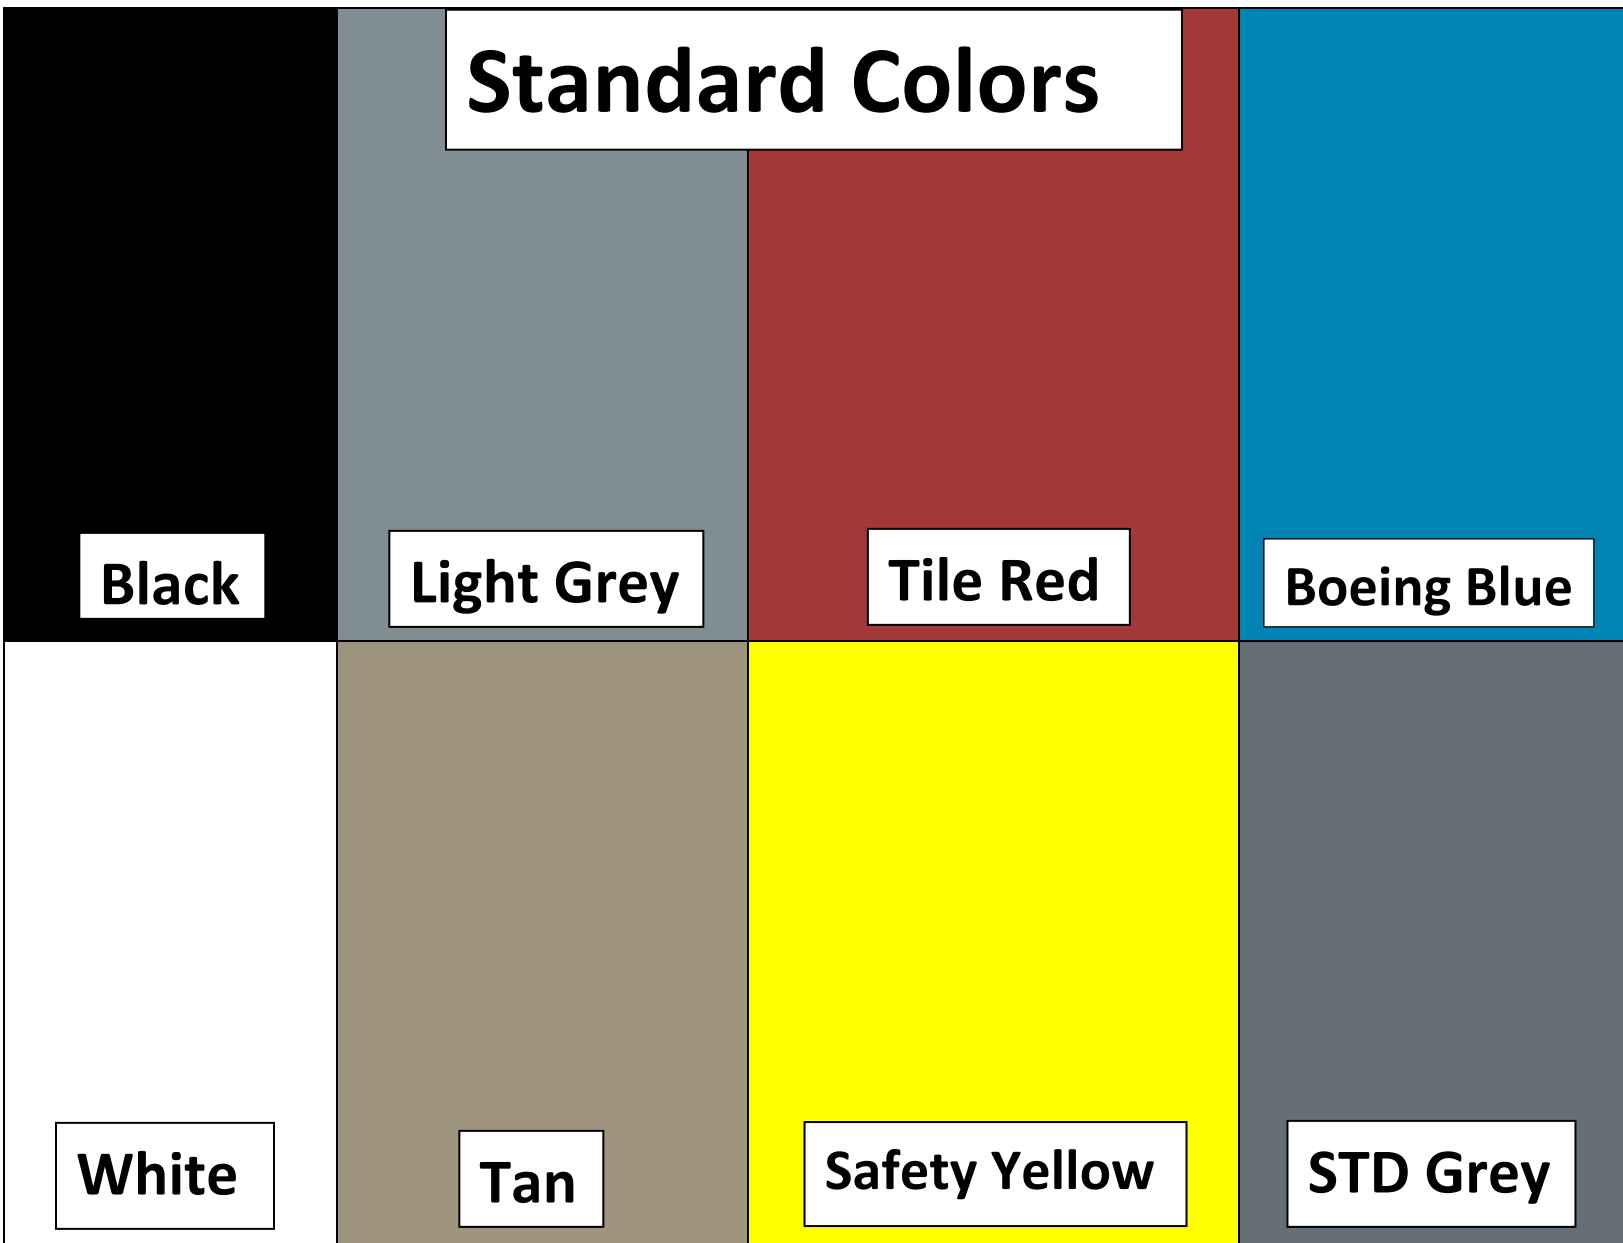

Custom colors and color matching is available. Charges may apply. Please contact Absolute Protective Coatings for more details.
